DEBATE SUMMARY

MOTION : THIS HOUSE OPPOSES THE
LEGALIZATION OF ABORTION AS THE PRIMARY
EXIT FROM SEXUAL HARRASMENT

PRIME MINISTER (1ST SPEAKER) =

I think the prime minister firmly believes that every life, including that of an unborn child, should be given the opportunity to develop and flourish, considering that these infants have no say in entering the world. It is crucial to offer these babies the chance to live a fulfilling life. Therefore, when a mother thinks about abortion, the Prime Minister sees this as equivalent to ending a life, drawing a strong comparison to a grave act like murder.

DEPUTY PRIME MINISTER (3RD SPEAKER) =

The deputy of prime minister believes that such acts are heinous and perpetrators of rape must be punished. It is deeply challenging for the victim, especially if she becomes pregnant, as she will endure emotional trauma and potentially have to raise the child alone if the rapist refuses responsibility. Furthermore, the baby deserves love and care, but being born from such a traumatic event may hinder their chances of a bright future, possibly facing rejection from society. Therefore, it's imperative to support the victim to prevent further trauma and ensure she can build a better life.

MEMBER OF GOVERNMENT (5TH SPEAKER) =

The member of the government believes that women from all walks of life face opposition and must determine what is best for them. Mothers, in particular, share a profound connection with their children. She disagrees with the notion that abortion provides healing for women, as fundamentally, abortion is not a

LEADER OF OPPOSITION (2ND SPEAKER) =

What I got the previous debate that I think the leader of opposition believes that although sexual harassment is unacceptable, it is essential to consider the perspective of those who have experienced such harassment. Many women may feel uncomfortable with the idea of getting pregnant due to concerns about their physical appearance and the challenges they might face in securing employment. Opting for abortion could provide them with greater freedom to pursue various opportunities, shield them from ridicule, and offer a pathway for women to heal from the trauma they have endured.

DEPUTY OF OPPOSITION (4TH SPEAKER) =

The Deputy of Opposition stands with the legalization of abortion. This stance is grounded in the understanding that such a move would not only provide women with the autonomy to make decisions regarding their bodies but also alleviate the burdens faced by victims of harassment. Legalization ensures that women have access to safe and regulated procedures, mitigating the risks associated with unsafe abortions. Moreover, it acknowledges the complexities of each situation and empowers women to address their trauma in a manner that best suits their individual needs.

MEMBER OF OPPOSITION (6TH SPEAKER)

The member of the opposition believes that Indonesia faces significant challenges in providing adequate sexual education, particularly due to its vast geographical expanse. This lack of proper education disproportionately affects women, who often become victims of harassment. There is a

solution to resolve issues. Asserting one's right to healing through such means is considered violence. Additionally, it's deemed irresponsible for both the victim and the perpetrator to opt for abortion. Instead, the solution lies in offering support to the victim, while ensuring that perpetrators are held accountable under the law.

WHIP OF GOVERNMENT (7TH SPEAKER) =

The whip of the government believes that addressing the issue of sexual harassment is paramount in our society. It recognizes that engaging in abortion can induce feelings of guilt in victims, who may also face social rejection due to the inherent violence involved. Furthermore, victims of rape-induced pregnancies experience trauma, compounding their suffering. Society must refrain from stigmatizing these victims, recognizing them as individuals who have undergone immense trauma and often lack agency in their situations. Education on sexual harassment is crucial as it empowers individuals to recognize, prevent, and address such abuses, fostering a safer and more inclusive society.

pressing need to prioritize the support and protection of these women who have endured such experiences. Furthermore, the member contends that legalizing abortion can offer financial relief to those in need. Additionally, legalization provides victims with the option to alleviate their trauma in a more accessible manner. By legalizing abortion, we can provide avenues for women to seek proper medical and psychological assistance, ultimately contributing to their overall well-being and recovery from the trauma of harassment.

WHIP OF OPPOSITION (8TH SPEAKER) =

The whip of the opposition believes that every life holds significance, particularly that of both the unborn child and its mother, deserving protection. It asserts that perpetrators of rape should not merely face lenient sentences but rather deserve severe punishment for their actions. Thus, it is within the woman's rights to decide whether to undergo abortion or not, as it remains her choice. Moreover, considering she has been subjected to rape against her will, she should have the autonomy to make this decision. Therefore, she has the right to opt for abortion without facing societal judgment or legal constraints
